Congress organisation	XI
ISMS Executive Committee and Council Executive Committee	Xffl
Congresses of ISMS	XV
Foreword and editorial	xvn
Welcome to the Netherlands	XIX
Welcome	xxi
ISMS President's welcome	XXHI

Keynote lectures

Use of agricultural waste materials in the cultivation of mushrooms <i>J.Poppe</i>	3
Genetics and breeding of <i>Agaricus bisporus</i> <i>A S. M. Sonnenberg</i>	25
Medicinally important fungi <i>V.KCOoi</i>	41

1 Physiology of edible fungi

Detection of hydrogen peroxide in cultures of the edible mushroom, <i>Agaricus bisporus</i> <i>J.-M.Savoie, M.Besson & J.Caluori</i>	55
Trehalose and mannitol metabolism in <i>Agaricus bisporus</i> <i>W.J.B. Wannet, Cvan der Drift, H.J.M.Op den Camp & L.J.LD.Van Griensven</i>	63
The glutamine synthetase from the edible mushroom <i>Agaricus bisporus</i> <i>MA S. H. Kersten, Cvan der Drift, H.J. M. Op den Camp, J.J.P.Baars, L.J. L D. Van Griensven, P.J. Schaap, Y. M tiller, J. Visser & J.A. M.Leunissen</i>	11

Maturation and activation of latent tyrosinase from <i>Agaricus bisporus</i> <i>J.CEspin, CSoler-Rivas & H.J.Wichers</i>	79
<i>Cantharellus cibarius</i> : Carbon and amino acid metabolism in relation to its fruit body-inhabiting fluorescent <i>Pseudomonas</i> <i>J.I.Rangel-Castro, KDanell, J.Borowicz & F.Martin</i>	87
The effect of light on catalase activity in <i>Pleurotus</i> morphogenesis <i>O.Danay, LOleinik, D.Levanon, LChet & Y.Hadar</i>	95

2 Development and morphogenesis

Mushroom mechanics and mathematical models of mushroom morphogenesis <i>D.Moore, AMeskauskas, M.AReeve, CSdnchez & S.W.Chiu</i>	103
Cultivation substrate determines hyphal ultrastructure during development of <i>Pleurotus pulmonarius</i> fruit bodies <i>C. Sanchez</i>	109
Programmed cell death is not involved in initiation of the gill cavity of <i>Coprinus dnereus</i> : A study using morphological mutants <i>S.W.Chiu&D.Moore</i>	115
Gross- and microscopic anatomy of <i>Agaricus bisporus</i> in health and disease <i>M.H.Umar & L.J.L.D. Van Griensven</i>	121
Molecular approaches to identify morphogenes in <i>Agaricus bisporus</i> <i>S.Sreenivasaprasad, V.Krishnamurthy, S.M.J.Lewis & K.S.Burton</i>	129
Post-harvest quality in <i>Agaricus bisporus</i> : Changes in gene expression <i>D.C.Eastwood, C.S.Kingsnorth, H.Jones & K.S.Burton</i>	137

3 Genetics and breeding

3.1 Transformation and molecular breeding techniques

Selection systems for genetically modifying basidiomycetous fungi <i>F.HJ.Schuren</i>	145
Molecular breeding of the oyster mushroom using a homologous DNA-mediated transformation system <i>Y.Honda, T.Irie, T.Watanabe & M.Kuwahara</i>	151
Molecular techniques for the breeding of <i>Pleurotus ostreatus</i> <i>L.Ramirez, L.M.Larraya, M.M.Penas, G.Perez, A.Eizmendi, LAgos, D.Arana, J.Aranguren, Llribarren, N.Olaberria, KPalacios, B.E.Ugarte&A.G.Pisabarro</i>	157
Transformation technologies for mushrooms <i>M.P.Challen, K.E.Gregory, S.Sreenivasaprasad, C.C.Rogers, S.B.Cutler, D.C.Diaper, T.J.Elliott & G.D.Foster</i>	165

<i>Agrobacterium tumefaciens</i> mediated transformation of <i>Agaricus bisporus</i> T.S.P. Mihosch, B. Lavrijssen, A. S. M. Sonnenberg & L.J.L.D. Van Griensven	173
 3.2 Selection markers I Molecular phylogeny I Systematics	
A brief history of marker assisted selection in <i>Agaricus bisporus</i> R.W.Kerrigan	183
RAPD analysis of species diversity and genomic differences in <i>Agaricus bisporus</i> S.Song, W.Zeng, Z.Wang & W.Su	191
Use of a SCAR marker for cap color in <i>Agaricus bisporus</i> breeding programs M.Loftus, L.Bouchti-King & C. Robles	201
Molecular systematics of the genus <i>Pleurotus</i> using sequence-specific oligonucleotide probes H.KLee, C.S.Shin, K.B.Min, K.S.Choi, B.G.Kim, Y.B.Yoo & K.H.Min	207
Phylogenetic analysis of the <i>Agrocybe aegerita</i> <i>nd6</i> gene P.Gonzalez, G.Barroso & J.Labarere	215
Phylogeny and evolution of mitochondrial sequences in mushrooms P.Sirand-Pugnet, P.Gonzalez & J.Labarere	223
 3.3 Population genetics I resources; Genetics and molecular biology	
Diversity of rDNA sequences indicates that China harbours the greatest germplasm resource of the cultivated mushroom <i>Lentinula edodes</i> S.W.Chiu, W.T.Chiu, F.CLin & D.Moore	239
Discovery of a wild Mediterranean population of <i>Agaricus bisporus</i> , and its usefulness for breeding work P.Callac, M.Imbernon, J.Guinberteau, L.Pirobe, S-Granit, J.-M.Olivier & I.Theochari	245
Distribution of the mating type alleles in a Greek population of <i>Pleurotus ostreatus</i> L.Theochari & A.Nikolaou	253
Genetic study on monokaryotic oidium formation from dikaryotic mycelia in a basidiomycete, <i>Pholiota nameko</i> H. Cao, H. Yamamoto & Y. Kitamoto	259
Cloning cold-shock related genes from the <i>Volvariella volvacea</i> genomic library M. Chen, N.Li, N. Wang, X. Lin, Y. Pan & S. C. Jong	267
Distribution and transmission of <i>Agrocybe aegerita</i> dsRNAs G. Barroso & J. Labor ere	271

Observation and measurement of spores of different <i>Agaricus</i> species in a scanning electron microscope <i>CKEvered, R.Noble, C.M.Clay & R.Li</i>	281
3.4 Breeding of new strains	
Breeding brown hybrids of button mushroom (<i>Agaricus bisporus</i>) from a factorial cross <i>ARodier, CDevesse, T.Rousseau, R.Vedie, MJmbernon & J.M.Olivier</i>	289
Breeding studies on development of high yielding and quality hybrids of <i>Agaricus bitorquis</i> <i>M.C.Yadav, B.L.Dhar & R.N.Verma</i>	299
Cultivation of <i>Pleurotus ostreatus</i> hybrids resistant to 2DG obtained by pairings of neohaplonts from selected dikaryons <i>AArias, R. Ramirez & H. Leal</i>	305
Breeding biology and species relationships in the genus, <i>Agaricus</i> <i>L Calvo-Bado, M. P. Challen & T.J. Elliott</i>	311
Development of a sporeless strain of oyster mushroom <i>Pleurotus ostreatus</i> <i>J.J.P.Baars, AS.M.Sonnenberg, T.S.P.Mikosch & LJ.LD.Van Griensven</i>	317
4 Substrates	
4.1 Compost for agaricus	
Minerals and microelements in the mushroom substrate: A production-limiting factor? <i>B.Desrumaux, ACalm & P. Sedeyn</i>	327
The effects of poultry manure based formulations on odor generation in phase I mushroom composting <i>J.APecchia, D.M.Beyer & P.J.Wuest</i>	335
The use of Time Domain Reflectometry to monitor water relations in mushroom substrate and casing <i>D.M.Beyer, K.M.Lomax & R.B.Beelman</i>	341
NIRS as a tool for the rapid prediction of the chemical composition of compost <i>J. WResink & M. van den Hurk</i>	349
The succession of microfungi in the compost during the cultivation of <i>Agaricus bisporus</i> (Lange) Imbach <i>I. Milenkovic, M. Ljaljevic Grbic & J. Vukojevic</i>	355

4.2 Substrates for other edible fungi

Influence of urea and ammonium chloride on crop yield and fruit body size of shiitake (<i>Lentinula edodes</i>) <i>P.P.Kalberer</i>	361
Influence of wood chip particle size used in substrate on biological efficiency and post-soak log weights of shiitake <i>D.J.Royse & J.E Sanchez-Vazquez</i>	367
Potential role of fungi for long term manned space missions <i>L.Marin-Vinader, F.Eckhard, Ch.Lasseur, H.J.Wichers & C.Soler-Rivas</i>	375
Use of sugarcane bagasse for mushroom and animal feed production <i>L.G.Permana, G.Flachowsky, U.terMeulen & F.Zadrazil</i>	385
Activities of ligninolytic enzymes as a means for monitoring the colonization of straw substrate pretreated at different temperatures by <i>Pleurotus ostreatus</i> <i>Cin der Wiesche, M.Wolter, F.Zadrazil & S.Aksu</i>	391

4.3 Compost chemistry and microbiology

Survey of microbial diversity within mushroom substrate using molecular techniques <i>K.L.Ivors, D.M.Beyer, P.J.Wuest & S.Kang</i>	401
<i>In vivo</i> interaction studies on mesophilic fungi isolated during <i>Agaricus bisporus</i> composting <i>B.Vijay, S.R.Sharma & T.N.Lakhanpal</i>	409
Micromycetes in the substrate and the hyphosphere of <i>Agaricus bisporus</i> <i>N.Nugaeva</i>	417
Growth of <i>Agaricus bisporus</i> on grain pre-colonized by <i>Humicola insolens</i> and growth of mushroom mycelium from this spawn on compost <i>V.T.Bilay</i>	425

4.4 Physics, chemistry and biology of casing

Continuous measurement of casing soil and compost water availability in relation to mushroom yield and quality <i>R.Noble, T.Rama, A.Dobrovin-Pennington</i>	433
Impact of physico-chemical properties of casing on yield of <i>Agaricus bisporus</i> (Lange) Imbach <i>M.Singh, R.P.Singh & H.S. Chaube</i>	441
Microbiological properties of casing <i>T.Fermor, S.Lincoln, R.Noble, A.Dobrovin-Pennington & N.Colauto</i>	447

Osmotic/ matric potential affects mycelial growth and endogenous reserves in <i>Agaricus bisporus</i> <i>T.M.Beecher, N.Magan &K.S.Burton</i>	455
Author index	463

Table of contents

5 Crop management

5.1 The cultivation of *Agaricus bisporus*

Water hardness and CaC^{hi} Dutch mushroom growing systems: 467

Effect on yield and quality

R.Desrumaux, A.Calus & P.Sedeyn

The effect of calcium chloride irrigation on yield and quality 475

of *Agaricus bisporus*

P.Diamantopoulou, A.Philippoussis, L.Lahouvaris & G.Parissopoulos

Cultural strategies to increase yield and improve quality of fresh 483

and processed mushroom (*Agaricus bisporus*) products

R.B.Beelman, S.Simons & D.Beyer

Addition of calcium chloride to irrigation water increases calcium content 491

and improves quality of *Agaricus* mushrooms independent of inherent calcium content

R.B.Beelman & S.Simons

Calcium and selenium enrichment during cultivation improves 499

the quality and shelf life of *Agaricus* mushrooms

S.C.Hartman, R.B.Beelman & S.Simons

Dry matter content in mushrooms (*Agaricus bisporus*) as an indicator 507

for mushroom quality

P.C.C.vanLoon, H.A.T.I.Swinkels & L.J.L.D.VanGriensven

5.2 The cultivation of other edible fungi

Biodegradation of lignocellulosic wastes through cultivation of *Pleurotus* 517

sajor-caju

M.P.Singh

Potential for the cultivation of exotic mushroom species by exploitation of Mediterranean agricultural wastes	523
<i>APhilippoussis, P.Diamantopoulou, G.Zervakis & S.Ioannidou</i>	
Effect of nutrients on mycelial growth and sclerotia formation in <i>Morchella esculenta</i>	531
<i>S.K.Singh & R.N.Verma</i>	
Woodland specialty mushrooms: Who grows them and what are the problems?	535
<i>J.N.Bruhn, M.K.Kozak & J.Krawczyk</i>	
Cultivation techniques for <i>Dictyophora</i> , <i>Polyporus umbellata</i> , and <i>Coprinus comatus</i>	543
<i>M.-M.Chen</i>	
Bioconversion of wheat straw by <i>Lentinus tuber regium</i> and its potential utilization as food, medicine and animal feed	549
<i>ABraun, M.Wolter, F.Zadrazil, G.Flachowsky & C.C.Mba</i>	
6 Pest and diseases 6.1 Fungal diseases	
Pathology and pathogenesis of <i>Mycogone perniciosa</i> infection of <i>Agaricus bisporus</i>	561
<i>M.H.Umar, F.P.Geels & L.J.LD. Van Griensven</i>	
Studies on wet bubble disease of white button mushrooms (<i>Agaricus bisporus</i>) caused by <i>Mycogone perniciosa</i>	569
<i>S.R.Sharma & S.Kumar</i>	
Siderophore producing bacteria as potential biocontrol agents of mushroom diseases	577
<i>M.Singh, R.P.Singh & H.S.Chaube</i>	
Chemical and biological management of major fungal pathogens of <i>Agaricus bisporus</i> (Lange) Imbach	587
<i>N.Bhatt & R.P.Singh</i>	
The liberation of cobweb (<i>Cladobotryum mycophiluni</i>) conidia within a mushroom crop	595
<i>B.A.T.Adie & H.M.Grogan</i>	
Cell wall degrading enzymes produced by <i>Verticillium</i> spp and their relationship to infection in <i>Agaricus bisporus</i>	601
<i>P.R.Mills, T.Fermor, S.Muthumeenakshi & S.Lincoln</i>	

6.2 *Trichoderma: Its spread and prevention*

Moulds in spawn-run compost and their effect on mushroom production <i>H.M.Grogan, A.Scruby & L.Harvey</i>	609
Management of green mould disease in Canada <i>D.L.Rinker & G.Alm</i>	617
Green mould disease in France: <i>Trichoderma harzianum</i> Th2 and other species causing damages on mushroom farms <i>M.L.Mamoun, R.lapicco, J.-M.Savoie & J.-M.Olivier</i>	625
Evaluation of epidemiological factors and mushroom substrate characteristics influencing the occurrence and development of <i>Trichoderma</i> green mold <i>D.M.Beyer, P.J.Wuest & J.J.Kremser</i>	633 *
Using spawn strain resistance to manage <i>Trichoderma</i> green mold <i>M.G.Anderson, D.M.Beyer & P.J.Wuest</i>	641
Green mould disease - The study of survival and dispersal characteristics of the weed mould <i>Trichoderma</i> , in the Irish mushroom industry <i>K.Morris, O.Harrington, O.P.E.Doyle & K.J.C.Clancy</i>	645
Identification of <i>Trichoderma</i> species causing green mould in button mushroom farms, distribution and their relative abundance <i>Y.R.Danesh, E.M.Goltapeh & H.Rohani</i>	653
Studies on interaction between <i>Trichoderma</i> species and <i>Agaricus bisporus</i> mycelium <i>EM.Goltapeh & Y.R.Danesh</i>	661 Awrtto&ft & KV.
Inoculum adaptation changes the outcome of the competition between <i>Lentinula edodes</i> and <i>Trichoderma</i> spp. during shiitake cultivation on pasteurized wheat straw <i>J.-M.Savoie, P.Delpech, C.Billette & G.Mata</i>	667 •%
Control of <i>Trichoderma</i> with glucose oxidase <i>M.Jansen, L.J.L.D.Van Griensven & J.A.Field</i>	675

6.3 *Viral and bacterial diseases, pests*

Sources of variations in the assessment of <i>Agaricus bisporus</i> susceptibility to brown blotch <i>M.L.Mamoun, F.Moquet, C.Devesse & J.-M.Olivier</i>	681
Biological control of some important mushroom diseases in Turkey by fluorescent <i>Pseudomonads</i> <i>T.Bora & Kdzaktan</i>	689 a>

..A.'

Bacterial inoculants and their effect on the pinning, yield and false truffle disease incidence in <i>Agaricus bitorquis</i> O.P.Ahlawat&R.D.Rai	695
A new virus disease of <i>Agaricus bisporus</i> R.H.Gaze, L.Calvo-Bado, M.P.Challen, B.A.T.Adie & C.P.Romaine	701
Population development of mushroom pests on species and strains of <i>Agaricus</i> P.E.White&J.K.Smith	707
\(\wedge f,	
1 Quality control	
The science of mushroom quality K. Burton, S.Sreenivasaprasad, D.Eastwood, T.Rama, T.Beecher & S.Molloy	715
Identification and quality evaluation of two wild mushrooms in relation to <i>Agaricus bisporus</i> from Jordan K. I. Ereifej & A.M.Al-Raddad	721
Relationship between sporophore morphology and mushroom quality T.Rama, K. S. Burton & J.F.VVincent	725
Dynamics of water translocation in freshly harvested and stored mushrooms of <i>Agaricus bisporus</i> T.M.Beecher, N.Magan & K.S.Burton	733
Post harvest fungal contaminants of <i>Pleurotus sajor-caju</i> and <i>Volvariella volvaceae</i> and its biological management P.Gogoi & P.Baruah	741
Postharvest development of the common mushroom (<i>Agaricus bisporus</i>) A.Braaksma	745
8 Medically and industrially important edible fungi	
Acceptability and protein quality of supplementary foods developed out of oyster mushroom powder (<i>Pleurotus sajor-caju</i>) A. Mane, S.Deshmukh, P.Mohite & G. Pusatkar	753
Developmental plasticity of Hong Kong lingzhi as a response to the environment S.W.Chiu, K.W.Cheung, W.M.Law, H.W.Au Yeung, S.Y.Ma & W.L.Chu	* 757
Investigations of mycelium growth and fruit body development of different strains of the beech mushroom Shimeji (<i>Hypsizygus marmoreus</i> Bull.: Fries) Singer M.Lomberh, A.Buchalo, E.Solomko, A.Grygansky & B.Kirchhoff	763
Shiitake cultivation systems A.W.Chen, N.Arrold & P.Stamets	771

Growth of edible and medicinal mushrooms on commercial agar media <i>V.T.Bilay, K.F. Solomko & A.S. Buchalo</i>	779
Applied research on edible mushrooms in the Republic of Armenia <i>S.G. Nanagulyan</i>	783
The regulation of dietary supplements from medicinal mushrooms <i>S.P. Wasser, K. Nevo, D. Sokolov, S.V. Reshetnikov & M. Timor-Tismenetsky</i>	789
Influence of substrate formulation and autoclave treatment on <i>Lentinula edodes</i> production <i>M. Kilpatrick, D.J. Murray & E. Ward</i>	803

9 Environmental aspects of mushroom cultivation

Energy balance between growing process and climate control in mushroom growing <i>J.H. Gielen</i>	813
Cultivation of <i>Pleurotus ostreatus</i> with beer spent grains and utilization of carbonized waste substrate as a soil ameliorant <i>K. Iwase, Y. Umezawa & K. Masuda</i>	819
Metabolization of pyrene in wheat straw by brown- and white-rot fungi <i>M. Wolter, F. Zadrazil & R. Martens</i>	827
Bioremediation: Use of composts and composting technologies <i>T. Fermor, N. Watts, T. Duncombe, R. Brooks, A. McCarthy, K. Semple & B. Reid</i>	833

ix *V

10 Economics of the industry and market research

Cultivation of edible mushrooms in Greece: Presentation of the current status and analysis of future trends <i>A. Philippoussis & G. Zervakis</i>	843
Competitive advantages of chain strategies in the Western European mushroom industry <i>P.J.P. Zuurbier & A.J.J. van Roestel</i>	849

ix

11 Mushroom cultivation: Teaching and extension

Mushroom growers' development of knowledge <i>G.J. F.M. van Megen-Boekeestijn</i>	859
Teaching mushroom cultivation through distance education <i>M. Ramachandraiah</i>	863

Publications and citations in science and research on the button mushroom, <i>Agaricus bisporus</i> <i>G.Straatsma, L.J.L.D. Van Griensven & G. Spikman</i>	871
---	-----

Technical sessions:

1 Cultivation technique of *Agaricus*; hygiene and farm management

Personnel management: Working conditions: The perception of labor <i>M.J.J.Maas</i>	879
Personnel management: "From employee to co-worker" <i>MJ.J.Maas</i>	883
Chain management <i>S.P.J.Klaver</i>	887
Computer control in mushroom growing: An updated inventory of applications <i>F.H.M.Lamber</i>	891
The Mycocell System <i>P.Hawton, P.Bartlett & L.J.Nisbet</i>	897

2 Equipment

Agricultural waste as substrate for the cultivation of edible fungi

The effect of thermal buoyancy on airflow in mushroom-growing houses <i>J. Grant</i>	901
Fruit optimization with wastes used for outdoor cultivation of King <i>Stropharia</i> <i>D.Domondon & J.Poppe</i>	909
Is conversion of lignocellulosics into feed with white rot fungi realizable? Practical problems of scale-up and technology transfer <i>F.Zadrazil</i>	919

3 Spawn, substrate, casing and cultivation

A different perspective on casing soil <i>J.F.de Gier</i>	931
--	-----

4 Cultivation technique

Progress in the cultivation of truffles <i>J.M.Olivier</i>	937
Production technology optimization for <i>Auricularia fuscosuccinea</i> <i>G.E.Morales, G.Huerta-Palacios & J.E.Sanchez-Vazquez</i>	943

Studies on the effect of vinyl covering on <i>Pleurotus</i> spp. cultivation - Improved picking efficiency off! <i>ostreatus</i> and <i>P. sajor-caju</i> <i>S.J.Oh, W.S.Kong, H.K.Kim, H.K.Kim & T.R.Fermor</i>	949
Cultivation of the black oak mushroom <i>Lentinula edodes</i> in China <i>F.C.Lin, X.M.Yang & ZWWang</i>	955
High production technology for Oyster mushroom <i>Pleurotus sajor-caju</i> (Fr.) Singer <i>CS.Sangitrao</i>	959
Author index	963
